RE: Cook Inlet Authorizations 📄

Cindi Godsey　to: Brown, Gerry R (DEC)　　　　　　　　11/14/2012 03:29 PM

There are files for AKG335000 but that is the NSGP. Cook Inlet is AKG315000. Unless there was some exploration drilling going on at existing platforms, there was one NOI for Furie and 2 for Buchaneer (Pioneer may still be in the system for Cosmo in addition to Buchaneer's coverage)

Cindi,

I may have been under the wrong impression that there were electronic files for previous authorizations for AKG335000 that have been extended. As we work on permits, I try to get current with files so we have solid footing moving forward and don't have to back-track the administrative records. I see now that those were likely sent in hard copy from Seattle? Please don't tell me they are in the boxes that I have been avoiding.

The current question is whether there are "any" other exploration authorizations under extension besides Furie and Buchaneer.

Gerry

The CIGP database is not very populated (in comparison to the NSGP) so there are no attachments within the database nor on the CD (the only ones I have done are the amendment to Buchaneer and their acquisition of Cosmo). What are you looking for?

Hi Cindi,

I finally got around to opening the CD with the database and was not seeing the ability to open authorizations . It may be my inexperience with Access, or, were they included in the CD?

Gerry
